Dear Sir/Madam,

I am writing to apply for an internship at SAP.
I believe my passion for computer science, my professional experience and my contributions to open source software projects make me a good candidate.

I'm currently studying Applied Computer Science at the university college Hogeschool Gent, situated in Ghent, Belgium. I'm in my second year now, searching for a challenging and international internship. Besides studying at school, I love working on my own computer science projects; some of them are uploaded on Github.

Furthermore, this semester I will learn Research techniques, advanced statistics, Node.js, Angular and Redux and more. Further, during the month of July, I'll be working as a job student on Machine learning driven automation enhancement of a CI/CD environment, for Western Digital during which I'll learn more about Big data, Scikit-Learn, Python, Jenkins, Flask and Linux.

It would be possible for me to begin my internship starting from the month of February (2020). And preferably it would end before the month of July.

I believe that I would be an asset to your program and that this internship would provide me with the ideal opportunity to expand my knowledge and experience.

Thank you for your consideration

Sincerely,

Milad Nazari
